3.1.2.C Local Transport provides the transmission facilities between the Carrier premises or collocated interconnection location and Teligent's end-office **switch(es)** where the Carrier's traffic is switched to originate or terminate Carrier's communications. Local Transport elements include:

1. Switch Transport provides the transmission path from the Serving Wire Center ("WCC") of the Carrier's premises to an end office utilizing switching functions. Switched Transport consists of circuits dedicated to the use of a single Carrier from the Carrier's premises to the circuits used in common by multiple Carriers from Teligent's switch to an end office.
 - (a) Switched Transmission Switched Transmission provides for the transmission facilities from the access tandem to the end office where calls are switched to originate or terminate. Switched Transmission includes the transmission medium itself (e.g., wire, fiber or RF). The Switched Transmission subelement also provides for certain interoffice links that are provided for the common use of all customers but which are not switched through an access tandem. When Tandem Switched Transmission is applied to such transport, Teligent will identify such transport as Common Transport to clarify that the interoffice links were not switched through an access tandem. When both Switched Transmission and Common Transport are applicable, mileage is measured separately. Switched Transmission is billed on a per minute per mile of use basis. The amount billed by Teligent and the amount billed by the ILEC will be based on the portion of distance between the Carrier's premises and Teligent's switch serviced by each LEC. Distance will be calculated pursuant to the distance calculation contained in NECA Tariff FCC No. 4.
 - (b) Switched Termination includes certain circuit equipment that is used at the ends of the interoffice links and employed to derive the channels on the transmission medium and circuit equipment used within the network to manage the circuits at intermediate locations. Tandem Switched Termination is billed on a per access minute of use basis.
